PERSONAL STATEMENT

I am an Experienced Web Developer especially using PHP Programming. I have been working in IT Development since 2016. I have strong skills in PHP Programming and have developed many project websites using PHP programming, especially using the Codelgniter/Laravel framework. In addition, I also like to make mobile apps. I am interested in joining a growing company where I can use my skills and experience to achieve company goals.

WORK EXPERIENCE

● Freelancer (Web Developer)

2016 - 2018

I have worked as an IT freelancer since 2016 and have been involved in many project web applications. In general, the project was built using PHP programming, especially using Codelgniter/Laravel framework. My responsibilities for : design overall architecture of the web application, design user interface, design database system, develop the required features, manage backend and work on bug fixing and improving application performance.

● PT. Perkebunan Nusantara V (PHP Developer)

March 2018 - July 2018

Here I have the opportunity to do an internship and be placed in the Information Technology section. I worked as PHP Developer and have responsibilities for: design overall architecture of the web application, developing and maintaining internal systems, handling bug fixing and maintaining quality and ensuring responsiveness of applications.

● PT. Lawencon Internasional (PHP Developer)

December 2018 - December 2019

I worked onsite on IT Research and Development in PT. Bank Rakyat Indonesia (BRI) as PHP Developer. My responsibilities are: developing and maintaining internal web applications, handling bug fixing from internal testers, creating REST Web Services APIs, working with outside data sources and APIs, and designing database of the web application.

● MeetAp (Trainer Web and Mobile Dev)

March 2019 - Present

Here I was appointed as a web trainer especially in PHP programming. My responsibilities are: teach basic PHP Programming, create RESTful APIs with PHP Programming, teach database design based on a developed system, research new technology for application improvement and help handle bug fixing from participants.

● PT. Barumi Multi Talenta (Web Developer)

January 2020 - May 2020

I worked onsite on Business Technology in PT. Cipta Krida Bahari as PHP Developer. My responsibilities are: developing and maintaining internal web application Human Resource Information System (HRIS), handling bug fixing from internal testers, creating REST Web Services APIs, working with outside data sources and APIs, and designing database of the web application.

● PT. Waruna Nusa Sentana (Application Programmer)

June 2021 - Present

I'm currently working at PT. Waruna Nusa Sentana as Application Programmer. My responsibilities are: developing and maintaining internal web & application company, backup server check, handling bug fixing from internal testers, creating REST Web Services APIs, working with outside data sources and APIs, and designing database of the web application.
