

DAFTAR ISI

| | |
|------------------------------------------------------------------------------------------|----------|
| DAFTAR ISI | 1 |
| 4.1 UNDERSTANDING THE ORGANIZATION AND ITS CONTEXT | 1 |
| 4.2 UNDERSTANDING THE NEEDS AND EXPECTATIONS OF INTERESTED PARTIES | 1 |
| 4.3 DETERMINING THE SCOPE OF THE QUALITY MANAGEMENT SYSTEM | 2 |
| 4.3.1 Determining the scope of the quality management system-supplemental | 2 |
| 4.3.2 Customer – Specific requirements | 3 |
| 4.4 QUALITY MANAGEMENT SYSTEM AND ITS PROCESSE | 3 |
| 4.4.1 | 3 |
| 4.4.1.1 Conformance of product and processes | 4 |
| 4.4.1.2 Product safety | 4 |
| 4.4.2 | 5 |
| 5 LEADERSHIP | 5 |
| 5.1 LEADERSHIP AND COMMITMENT | 5 |
| 5.1.1 General | 6 |
| 5.1.1.1 Corporate responsibility | 6 |
| 5.1.1.2 Process effectiveness and efficiency | 6 |
| 5.1.1.3 Process owners | 6 |
| 5.1.2 Customer Focus | 6 |
| 5.2 POLICY | 7 |
| 5.2.1 Establishing the quality policy | 7 |
| 5.2.2 Communicating the quality policy | 7 |
| 5.3 ORGANIZATIONAL ROLES, RESPONSIBILITIES AND AUTHORITIES | 7 |
| 5.3.1 Organizational roles, responsibilities, and authorities-supplemental | 8 |
| 5.3.2 Responsibility and Authority for product requirements and corrective actions | 8 |
| 6 PLANNING | 9 |
| 6.1 ACTION TO ADDRESS RISKS AND OPPORTUNITIES | 9 |
| 6.1.1 AND 6.1.2 | 9 |
| 6.1.2.1 Risk analysis | 10 |
| 6.1.2.2 Preventive action | 10 |
| 6.1.2.3 Contingency plans | 10 |

| | |
|---------------------------------------------------------------------------|-----------|
| 6.2 QUALITY OBJECTIVES AND PLANNING TO ACHIEVE THEM | 11 |
| 6.2.1 AND 6.2.2..... | 11 |
| 6.2.2.1 Quality objectives and planning to achieve them-supplemental..... | 12 |
| 6.3 PLANNING OF CHANGES..... | 12 |
| 7 SUPPORT | 12 |
| 7.1 RESOURCES..... | 12 |
| 7.1.1 General..... | 12 |
| 7.1.2 People..... | 13 |
| 7.1.3 Infrastructure | 13 |
| 7.1.3.1 Plant, facility and equipment planning | 13 |
| 7.1.4 Environment for the operation of processes | 14 |
| 7.1.4.1 Environment for the operation of the processes-supplemental | 14 |
| 7.1.5 Monitoring and measuring resources | 15 |
| 7.1.5.1 General | 15 |
| 7.1.5.1.1 Measurement systems analysis | 15 |
| 7.1.5.2 Measurement traceability..... | 15 |
| 7.1.5.2.1 Calibration/ Verification records | 16 |
| 7.1.5.3 Laboratory requirements..... | 17 |
| 7.1.5.3.1 Internal laboratory | 17 |
| 7.1.5.3.2 External laboratory | 18 |
| 7.1.6 Organizational knowledge | 18 |
| 7.2 COMPETENCE..... | 19 |
| 7.2.1 Competence-Supplemental | 19 |
| 7.2.2 Competence- on the job training | 20 |
| 7.2.3 Internal auditor competency..... | 20 |
| 7.2.4 Second- party auditor competency | 21 |
| 7.3 AWARENESS..... | 21 |
| 7.3.1 Awareness- supplemental..... | 22 |
| 7.3.2 Employes motivation and empowerment | 22 |
| 7.4 COMMUNICATION | 22 |
| 7.5 DOCUMENTED INFORMATION | 23 |

| | |
|-----------------------------------------------------------------------------------|-----------|
| 7.5.1 General..... | 23 |
| 7.5.1.1 Quality Management system documentation..... | 23 |
| 7.5.2 Creating and updating | 24 |
| 7.5.3 Control of documentation | 24 |
| 7.5.3.1 and 7.5.3.2 | 24 |
| 7.5.3.2.1 Record retention | 25 |
| 7.5.3.2.2 Engineering specifications | 25 |
| 8 OPERATION | 26 |
| 8.1 OPERATIONAL PLANNING AND CONTROL..... | 26 |
| 8.1.1 Operational planning and control-supplemental | 27 |
| 8.1.2 Confidentiality | 27 |
| 8.2 REQUIREMENT FOR PRODUCTS AND SERVICES | 27 |
| 8.2.1 Customer communication | 27 |
| 8.2.1.1 Customer communication-supplemental | 28 |
| 8.2.2 Determining the requirement for products and services..... | 28 |
| 8.2.2.1 Determining the requirement for products and services - supplemental..... | 28 |
| 8.2.3 Review of the requirement for products and services | 29 |
| 8.2.3.1 | 29 |
| 8.2.3.1.1 Review of the requirements for product and services-supplemental | 29 |
| 8.2.3.1.2 Customer-designated special characteristics..... | 39 |
| 8.2.3.1.3 Organization manufacturing feasibility | 30 |
| 8.2.3.2 | 30 |
| 8.2.4 Changes to requirement for product and services | 30 |
| 8.3 DESIGN AND DEVELOPMENT OF PRODUCT AND SERVICES..... | 30 |
| 8.3.1 General..... | 30 |
| 8.3.1.1 Design and development of product and services- supplemental | 31 |
| 8.3.2 Design and development planning | 31 |
| 8.3.2.1 Design and development planning-supplemental | 32 |
| 8.3.2.2 Product design skills | 32 |
| 8.3.2.3 Development of product with embedded software | 32 |
| 8.3.3 Design and development inputs | 33 |

| | |
|--------------------------------------------------------------------------------------------------|-----------|
| 8.3.3.1 Product design input | 33 |
| 8.3.3.2 Manufacturing process design input | 34 |
| 8.3.3.3 Special characteristic | 34 |
| 8.3.4 Design and development controls | 35 |
| 8.3.4.1 Monitoring | 35 |
| 8.3.4.2 Design and development validation | 35 |
| 8.3.4.3 Prototype programme | 36 |
| 8.3.4.4 Product and approval process | 36 |
| 8.3.5 Design and development outputs | 37 |
| 8.3.6.1 Design and development changes- supplemental | 38 |
| 8.4 CONTROL OF EXTERNALLY PROVIDED PROCESSES, PRODUCT AND SERVICES | 38 |
| 8.4.1 General | 39 |
| 8.4.1.1 General Supplemental | 39 |
| 8.4.1.2 Supplier selection process | 39 |
| 8.4.1.3 Customer-directed sources (also known as” Directed-Buy”) | 40 |
| 8.4.2 Type and extend of control | 40 |
| 8.4.2.1 Type and extend of control-supplemental | 41 |
| 8.4.2.2 Statutory and regulatory requirement | 41 |
| 8.4.2.3 Supplier quality management system development | 42 |
| 8.4.2.3.1 Automotive product-related software of automotive product with embedded software | 42 |
| 8.4.2.4 Supplier monitoring | 43 |
| 8.4.2.4.1 Second-Party audits | 44 |
| 8.4.2.5 Supplier development | 45 |
| 8.4.3 Information for external provider | 45 |
| 8.4.3.1 Information for external provider- supplemental | 46 |
| 8.5 PRODUCTION AND SERVICE PROVISION | 46 |
| 8.5.1 Control of production and service provision | 46 |
| 8.5.1.1 Control plan | 47 |
| 8.5.1.2 Standardised work- operator instructions and visual standards | 48 |
| 8.5.1.3 Verification of job set -ups | 48 |
| 8.5.1.4 Verfication after shutdown | 49 |

| | |
|---------------------------------------------------------------------------------------------------------|-----------|
| 8.5.1.5 Total Productive Maintenance | 49 |
| 8.5.1.6 Management of production tooling and manufacturing, test, inspection tooling and equipment | 49 |
| 8.5.1.7 Production scheduling | 50 |
| 8.5.2 Identification and traceability | 50 |
| 8.5.2.1 Identification and traceability – supplemental | 51 |
| 8.5.3 Property and belonging to customer or external providers | 52 |
| 8.5.4 Preservation..... | 52 |
| 8.5.4.1 Preservation – supplemental | 52 |
| 8.5.5 Post-delivery activities | 53 |
| 8.5.5.1 Feedback of information from services | 53 |
| 8.5.5.2 Service agreement with customer..... | 54 |
| 8.5.6 Control of changes | 54 |
| 8.5.6.1 Control of changes- supplemental | 54 |
| 8.5.6.1.1 Temporary change of process controls | 55 |
| 8.6 RELEASE OF PRODUCTS AND SERVICES | 56 |
| 8.6.1 Release of products and services- supplemental | 56 |
| 8.6.2 Layout inspection and functional testing | 56 |
| 8.6.3 Appearance items | 57 |
| 8.6.4 Verification and acceptance of conformity of externally provided products and services | 57 |
| 8.6.5 Statutory and regulatory conformity | 58 |
| 8.6.6 Acceptance criteria..... | 58 |
| 8.7 CONTROL OF NONCONFORMITY OUTPUTS | 58 |
| 8.7.1 | 58 |
| 8.7.1.1 Customer authorization for concession..... | 59 |
| 8.7.1.2 Control of nonconforming product- customer specified process | 59 |
| 8.7.1.3 Control of suspect product..... | 59 |
| 8.7.1.4 Control of reworked product | 60 |
| 8.7.1.5 Control of repaired product | 60 |
| 8.7.1.6 Customer notification | 61 |
| 8.7.1.7 Nonconformity product disposition..... | 61 |
| 8.7.2 | 61 |

| | |
|---------------------------------------------------------------------|-----------|
| 9 PERFORMANCE EVALUATION | 61 |
| 9.1 MONITORING, MEASUREMENT, ANALYSIS AND EVALUATION | 61 |
| 9.1.1 General..... | 61 |
| 9.1.1.1 Monitoring and measurement of manufacturing processes | 62 |
| 9.1.1.2 Identification of statistical tools | 63 |
| 9.1.1.3 Application of statistical concepts | 63 |
| 9.1.2 Customer Satisfaction | 63 |
| 9.1.2.1 Customer satisfaction- supplemental | 63 |
| 9.1.3 Analisis and evaluation | 64 |
| 9.1.3.1 Customer satisfaction- supplemental | 64 |
| 9.2 INTERNAL AUDIT | 64 |
| 9.2.1 and 9.2.2..... | 65 |
| 9.2.2.1 Internal audit programme | 65 |
| 9.2.2.2 Quality management system audit..... | 66 |
| 9.2.2.3 Manufacturing process audit | 66 |
| 9.2.2.4 Product audit | 66 |
| 9.3 MANAGEMENT REVIEW | 67 |
| 9.3.1 General..... | 67 |
| 9.3.1.1 Management review- supplemental..... | 67 |
| 9.3.2 Management review inputs | 67 |
| 9.3.2.1 Management review inputs – supplemental..... | 68 |
| 9.3.3 Management review outputs | 68 |
| 9.3.3.1 Management review outputs – supplemental..... | 69 |
| 10 IMPROVEMENT | 69 |
| 10.1 GENERAL | 69 |
| 10.2 NONCONFORMITY AND CORRECTIVE ACTION | 69 |
| 10.2.1 and 10.2.2 | 70 |
| 10.2.3 Problem solving..... | 70 |
| 10.2.4 Error- proofing | 71 |
| 10.2.5 Warranty management systems | 71 |
| 10.2.6 Customer complaints and field failure test analysis | 71 |

| | |
|--------------------------------------------------|----|
| 10.3 CONTINUAL IMPROVEMENT | 72 |
| 10.3.1 Continual Improvement – supplemental..... | 72 |

| | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>4.1 Understanding the organization and its context</p> <p>The organization shall determine external and internal issues that are relevant to its purpose and its strategic direction and that affect its ability to achieve the intended result(s) of its quality management system.</p> <p>The Organization shall monitor and review information about these external and internal issues.</p> <p>NOTE 1 Issues can include positive and negative factors or conditions for consideration.</p> <p>NOTE 2 Understanding the external context can be facilitated by considering issues arising from legal, technological, competitive, market, cultural, social and economic environment, whether international, regional or local.</p> <p>NOTE 3 Understanding the internal context can be facilitated by considering issues related to values, culture, knowledge and performance of the organization.</p> | <p>4.1 Memahami organisasi dan konteksnya</p> <p>Organisasi harus menetapkan masalah internal dan eksternal yang relevan dengan tujuan dan arahan strategis dan yang berpengaruh pada kemampuan untuk mencapai hasil yang diinginkan dari sistem manajemen mutu.</p> <p>Organisasi harus memantau dan meninjau informasi tentang isu eksternal dan internal.</p> <p>NOTE 1 Isu dapat termasuk faktor positif dan negatif atau kondisi yang dipertimbangkan.</p> <p>NOTE 2 Memahami konteks eksternal dapat difasilitasi dengan mempertimbangkan isu yang dengan mempertimbangkan hukum, teknologi, persaingan, pemasaran, budaya, masyarakat dan kondisi ekonomi baik lokal, regional, nasional, maupun internasional.</p> <p>NOTE 3 Memahami konteks internal dapat difasilitasi dengan mempertimbangkan masalah yang berkaitan dengan nilai, pengetahuan budaya dan kinerja organisasi.</p> |
| <p>4. Context of the organization</p> <p>4.1 Understanding the organization and its context</p> <p><i>See ISO 9001:2015 requirements.</i></p> | <p>4. Kontek Organisasi</p> <p>4.1 Memahami organisasi dan konteksnya</p> <p><i>Lihat persyaratan ISO 9001: 2015.</i></p> |
| <p>4.2 Understanding the needs and expectations of interested parties</p> <p>Due to their effect or potential effect on the organizations ability to consistently provide products and service that meet customer and applicable statutory and regulatory requirements, the organization shall determine:</p> <ul style="list-style-type: none"> a) the interested parties that are relevant to the quality management system; b) the requirements of these interested parties that are relevant to the quality management system. <p>The organization shall monitor and review information about these interested parties and their relevant requirements.</p> | <p>4.2 Memahami kebutuhan dan harapan pihak yang berkepentingan</p> <p>Karena pengaruh atau pengaruh potensial pada kemampuan organisasi untuk secara konsisten menyediakan produk dan jasa yang memenuhi persyaratan pelanggan serta peraturan dan perundang-undangan, organisasi harus menetapkan:</p> <ul style="list-style-type: none"> a) pihak berkepentingan yang relevan dengan sistem manajemen mutu; b) persyaratan dari pihak yang berkepentingan yang relevan dengan sistem manajemen mutu. <p>Organisasi harus memantau dan meninjau informasi tentang pihak yang berkepentingan ini dan persyaratan mereka yang relevan.</p> |

| | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>4.2 Understanding the needs and expectations of interested parties</p> <p><i>See ISO 9001:2015 requirements.</i></p> | <p>4.2 Memahami ruang lingkup sistem manajemen mutu</p> <p><i>Lihat persyaratan ISO 9001: 2015.</i></p> |
| <p>4.3 Determining the scope of the quality management system</p> <p>The organization shall determine the boundaries and applicability of the quality management system to establish its scope.</p> <p>When determining this scope, the organization shall consider:</p> <ul style="list-style-type: none"> a) the external and internal issues referred to in 4.1; b) the requirements of relevant interested parties referred to in 4.2; c) the products and services of the organization. <p>The organization shall apply all the requirements of this international standard if they are applicable within the determined scope of its quality management system.</p> <p>The scope of the organization's quality management system shall be available and be maintained as documented information. The scope shall state the types of products and services covered, and provide justification for any requirement of this standard that the organization determines is not applicable to the scope of its quality management system.</p> <p>Conformity to this Standard may only be claimed if the requirements determined as not being applicable do not affect the organization's ability or responsibility to ensure the conformity of its products and services and the enhancement of customer satisfaction.</p> | <p>4.3 Menetapkan ruang lingkup sistem manajemen mutu</p> <p>Organisasi harus menetapkan batas dan aplikasi sistem manajemen mutu untuk menetapkan lingkungannya.</p> <p>Ketika menetapkan lingkup, organisasi harus mempertimbangkan:</p> <ul style="list-style-type: none"> a) isu internal dan eksternal yang diacu pada 4.1; b) persyaratan terkait pihak berkepentingan yang diacu pada 4.2; c) produk dan jasa organisasi. <p>Organisasi harus menerapkan semua persyaratan Standar ini jika berlaku ditetapkan didalam ruang lingkup sistem manajemen mutu.</p> <p>Lingkup sistem manajemen mutu organisasi harus tersedia dan dipelihara sebagai informasi terdokumentasi. Lingkup harus menyatakan jenis produk dan layanan yang dicakup, dan memberikan keputusan untuk setiap persyaratan standar internasional ini yang organisasi menetapkannya tidak berlaku ke dalam ruang lingkup sistem manajemen mutu.</p> <p>Kesesuaian dengan Standar ini hanya boleh diklaim jika persyaratan yang ditentukan tidak dapat diterapkan, jika tidak berpengaruh pada kemampuan atau tanggung jawab organisasi untuk memastikan kesesuaian produk dan jasa dan peningkatan kepuasan pelanggan.</p> |
| <p>4.3 Determining the scope of the quality management system</p> <p><i>See ISO 9001:2015 requirement.</i></p> | <p>4.3 Menentukan lingkup sistem manajemen mutu-tambahan</p> <p><i>Lihat persyaratan ISO 9001:2015.</i></p> |
| <p>4.3.1 Determining the scope of the quality management system - supplemental</p> <p><i>Supporting functions, whether on-site or remote (such as design centers, corporate headquarters, and distribution centers), shall be included in the scope of the Quality Management System (QMS).</i></p> | <p>4.3.1 Menentukan lingkup sistem manajemen mutu - tambahan</p> <p><i>Fungsi Pendukung, apakah di tempat atau lokasi lain (seperti pusat desain, kantor pusat perusahaan, dan pusat distribusi), harus dimasukkan dalam ruang lingkup Sistem Manajemen Mutu (SMM).</i></p> |

| | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p><i>The only permitted exclusion for this automotive QMS Standard relates to the product design and development requirements within ISO 9001, section 8.3. The exclusion shall be justified and maintained as documented information (see ISO 9001, Section 7.5).</i></p> <p><i>Permitted exclusions do not include manufacturing process design</i></p> | <p><i>Satu-satunya pengecualian yang diizinkan untuk SMM Standar otomotif ini berkaitan dengan desain produk dan kebutuhan pengembangan dalam ISO 9001, bagian 8.3. Pengecualian yang akan dibenarkan dan dipelihara sebagai informasi terdokumentasi (lihat ISO 9001, Bagian 7.5).</i></p> <p><i>Pengecualian yang diizinkan tidak termasuk manufaktur proses desain.</i></p> |
| <p>4.3.2 Customer-specific requirements</p> <p><i>Customer-specific requirements shall be evaluated and included in the scope of the organizations quality management system.</i></p> | <p>4.3.2 Persyaratan khusus pelanggan</p> <p><i>Persyaratan khusus pelanggan harus dievaluasi dan termasuk dalam lingkup organisasi sistem manajemen mutu.</i></p> |
| <p>4.4 Quality management system and its processes</p> <p>4.4.1 The organization shall establish, implement, maintain and continually improve a quality management system, including the processes needed and their interactions, in accordance with the requirements of this International Standard.</p> <p>The organization shall determine the processes needed for the quality management system and their application throughout the organization, and shall:</p> <ul style="list-style-type: none"> a) determine the inputs required and the outputs expected from these processes; b) determine the sequence and interaction of these processes; c) determine and apply the criteria and methods (including monitoring, measurements and related performance indicators) needed to ensure effective operation and control of these processes; d) determine the resources needed for these processes and ensure their availability e) assign responsibilities and authorities for processes; f) address the risks and opportunities as determined in accordance with the requirements of 6.1 g) evaluate these processes and implement any changes needed to ensure that these processes achieve their intended result; h) improve these processes and the quality management system. | <p>4.4 Sistem manajemen mutu dan prosesnya</p> <p>4.4.1 Organisasi harus menetapkan, menerapkan, memelihara dan meningkatkan sistem manajemen mutu secara berkelanjutan, termasuk proses dan interaksinya yang diperlukan, sesuai dengan persyaratan Standard ini.</p> <p>Organisasi harus menetapkan proses yang diperlukan untuk sistem manajemen mutu dan aplikasinya di seluruh organisasi, dan harus:</p> <ul style="list-style-type: none"> a) menetapkan masukan yang dibutuhkan dan keluaran yang diharapkan dari setiap proses. b) menetapkan urutan dan interaksi proses; c) menetapkan dan menerapkan kriteria dan metode (termasuk pengukuran dan indikator kinerja terkait) yang diperlukan untuk memastikan operasi dan kendali proses yang efektif. d) menetapkan sumber daya yang diperlukan dan memastikan ketersediaan. e) penunjukkan tanggung jawab dan wewenang untuk proses tersebut; f) mengatasi risiko dan peluang sesuai dengan persyaratan dari 6.1, merencanakan dan menerapkan tindakan yang tepat untuk mengatasinya; g) mengevaluasi metode untuk memantau, mengukur, bila sesuai, dan mengevaluasi proses dan, jika diperlukan, perubahan proses untuk memastikan hal tersebut mencapai hasil yang dimaksud; h) meningkatkan proses dan sistem manajemen mutu. |

| | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>4.4 Quality management system and its processes</p> <p>4.4.1 See ISO 9001:2015 requirements.</p> <p>4.4.1.1 Conformance of products and processes</p> <p>The organization shall ensure conformance of all products and processes, including service parts and those that are outsourced, to all applicable customer, statutory, and regulatory requirements (see Section 8.4.2.2).</p> | <p>4.4 Sistem manajemen mutu dan proses-prosesnya</p> <p>4.4.1 Lihat persyaratan ISO 9001: 2015.</p> <p>4.4.1.1 Kesesuaian produk dan proses</p> <p>Organisasi harus memastikan kesesuaian dari semua produk dan proses, termasuk perbaikan komponen (service parts) dan pekerjaan yang dikerjakan oleh pihak ketiga (outsourcing), berlaku untuk seluruh persyaratan pelanggan, hukum, dan peraturan (lihat Bagian 8.4.2.2).</p> |
| <p>4.4.1.2 Product Safety</p> <p><i>The organization shall have documented processes for the management of product-safety related products and manufacturing processes, which shall include but not be limited to the following, where applicable:</i></p> <ul style="list-style-type: none"> a) <i>identification by the organization of statutory and regulatory product-safety requirements;</i> b) <i>customer notification of requirements in item a);</i> c) <i>special approvals for design FMEA;</i> d) <i>identification of product safety-related characteristics;</i> e) <i>identification and controls of safety-related characteristics of product and at the point of manufacture;</i> f) <i>special approval of control plans and process FMEAs;</i> g) <i>reaction plans (see Section 9.1.1.1);</i> h) <i>defined responsibilities, definition of escalation process and flow of information, including top management, and customer notification;</i> i) <i>training identified by the organization or customer for personnel involved in product-safety related products and associated manufacturing processes;</i> j) <i>changes of product or process shall be approved prior to implementation, including evaluation of potential effects on product safety from process and product changes (see ISO 9001, Section 8.3.6);</i> k) <i>transfer of requirement with regard to product safety throughout the supply chain, including customer-designated sources (see Section 8.4.3.1);</i> l) <i>product traceability by manufactured lot (at a minimum) throughout the supply chain (see Section 8.5.2.1);</i> m) <i>lessons learned for new product introduction.</i> | <p>4.4.1.2 Keamanan Produk</p> <p><i>Organisasi harus mendokumentasikan proses untuk manajemen keamanan produk terkait produk dan proses manufaktur, yang meliputi tetapi tidak terbatas pada berikut ini, dimana yang berlaku:</i></p> <ul style="list-style-type: none"> a) <i>identifikasi oleh organisasi persyaratan keamanan produk, hukum dan peraturan;</i> b) <i>pemberitahuan pelanggan persyaratan pada butir a);</i> c) <i>persetujuan khusus untuk desain FMEA;</i> d) <i>identifikasi karakteristik yang berhubungan dengan keamanan produk;</i> e) <i>identifikasi dan kontrol karakteristik yang berhubungan dengan keamanan produk dan pada titik pembuatan;</i> f) <i>persetujuan khusus dari control plan dan proses FMEA;</i> g) <i>rencana reaksi (lihat Bagian 9.1.1.1);</i> h) <i>menetapkan tanggung jawab, definisi proses eskalasi dan arus informasi, termasuk manajemen puncak, dan pemberitahuan pelanggan;</i> i) <i>identifikasi pelatihan oleh organisasi atau pelanggan untuk personal yang terlibat dalam produk terkait keamanan produk dan proses manufaktur terkait;</i> j) <i>perubahan dari produk atau proses harus disetujui sebelum pelaksanaan, termasuk evaluasi potensi dampak pada keamanan produk dari perubahan proses dan produk (lihat ISO 9001, Bagian 8.3.6);</i> k) <i>penyerahan produk yang berkaitan dengan keamanan produk di seluruh rantai pasokan, termasuk sumber pelanggan yang ditunjuk (lihat Bagian 8.4.3.1);</i> l) <i>keterelusuran produk yang diproduksi (minimal) di seluruh rantai pasokan (lihat Bagian 8.5.2.1);</i> m) <i>pelajaran untuk pengenalan produk baru.</i> |

| <p><i>possible. Example methods include but are not limited to the following:</i></p> <ul style="list-style-type: none"> a. <i>daily quality focused audits (e.g., layered process audits, as applicable);</i> b. <i>daily leadership meetings.</i> <p><i>Restart verification is documented for a defined period based on severity and confirmation that all features of the error-proofing device or process are effectively reinstated.</i></p> <p><i>The organization shall implement traceability of all product produced while any alternate process control devices or processes are being used (e.g., verification and retention of first piece and last piece from every shift).</i></p> | <p><i>sesegera mungkin. contoh metode termasuk tetapi tidak terbatas pada hal berikut:</i></p> <ul style="list-style-type: none"> a. <i>fokus audit kualitas harian (misalnya: proses audit berlapis, sebagaimana berlaku);</i> b. <i>meeting kepemimpinan harian.</i> <p><i>Verifikasi restart didokumentasikan untuk jangka waktu yang ditentukan berdasarkan tingkat keparahan dan konfirmasi bahwa semua fitur dari perangkat anti-salah atau proses secara efektif diatur kembali.</i></p> <p><i>Organisasi harus menerapkan mampu telusur untuk semua produk yang dihasilkan saat perangkat pengendalian proses alternatif atau proses sedang digunakan (misal: verifikasi dan penyimpanan produk pertama dan produk terakhir dari setiap shift).</i></p> |
| <p>8.6 Release of products and services</p> <p>The organization shall implement planned arrangements, at appropriate stages, to verify that the product and service requirements have been met.</p> <p>The release of products and services to the customer shall not proceed until the planned arrangements have been satisfactory completed, unless otherwise approved by a relevant authority and, as applicable, by the customer.</p> <p>The organization shall retain documented information on the release of products and services. The documented information shall include:</p> <ul style="list-style-type: none"> a) evidence of conformity with the acceptance criteria; b) traceability to the person(s) authorizing the release. | <p>8.6 Pelepasan produk dan jasa</p> <p>Organisasi harus menerapkan pengaturan terencana pada tahap yang sesuai, untuk meverifikasi bahwa persyaratan produk dan jasa telah dipenuhi.</p> <p>Pelepasan produk dan jasa pada pelanggan tidak akan dilanjutkan hingga pengaturan terencana telah lengkap dengan memuaskan, kecuali disetujui oleh otoritas yang relevan dan, jika berlaku, oleh pelanggan.</p> <p>Organisasi harus menyimpan informasi terdokumentasi atas pelepasan produk dan jasa. Informasi terdokumentasi harus mencakup:</p> <ul style="list-style-type: none"> a) bukti kesesuaian dengan kriteria keberterimaan; b) ketelusuran pada otoritas orang yang melepas. |
| <p>8.6 Release of products and services</p> <p><i>See ISO 9001 :2015 requirements.</i></p> | <p>8.6 Rilis produk dan jasa</p> <p><i>Lihat persyaratan ISO 9001: 2015.</i></p> |
| <p>8.6.1 Release of products and services - supplemental</p> <p><i>The organization shall ensure that the planned arrangements to verify that the product and service requirements have been met encompass the control plan and are documented as specified in the control plan (see Annex A).</i></p> <p><i>The organization shall ensure that the planned arrangements for initial release of products and services encompass product or service approval.</i></p> | <p>8.6.1 Rilis produk dan jasa - tambahan</p> <p><i>Organisasi harus memastikan pengaturan yang direncanakan untuk memverifikasi bahwa produk dan persyaratan pelayanan telah dipenuhi mencakup control plan dan didokumentasikan sebagaimana ditentukan dalam control plan (lihat Annex A).</i></p> <p><i>Organisasi harus memastikan bahwa pengaturan yang direncanakan untuk rilis awal produk dan pelayanan mencakup persetujuan produk atau pelayanan.</i></p> |

| | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p><i>The organization shall ensure that product or service approval is accomplished after changes following initial release, according to ISO 9001, Section 8.5.6.</i></p> | <p><i>Organisasi harus memastikan bahwa persetujuan produk atau pelayanan dicapai setelah perubahan mengikuti rilis awal, menurut ISO 9001, pasal 8.5.6.</i></p> |
| <p>8.6.2 Layout inspection and functional testing</p> <p><i>A layout inspection and a functional verification to applicable customer engineering material and performance standards shall be performed for each product as specified in the control plans. Results shall be available for customer review.</i></p> <p>NOTE 1 <i>Layout inspection is the complete measurement of all product dimensions shown on the design record(s).</i></p> <p>NOTE 2 <i>The frequency of layout inspection is determined by the customer.</i></p> | <p>8.6.2 Lay out inspeksi dan pengujian fungsional</p> <p><i>Sebuah layout inspeksi dan verifikasi fungsional yang berlaku untuk material engineering pelanggan dan standar kinerja harus dilakukan untuk setiap produk sebagaimana ditetapkan dalam control plan. Hasilnya harus tersedia untuk ditinjau oleh pelanggan.</i></p> <p>CATATAN 1 <i>Lay out inspeksi adalah pengukuran lengkap dari semua dimensi produk yang ditampilkan pada catatan desain.</i></p> <p>CATATAN 2 <i>Frekuensi pelaksanaan layout inspeksi ditentukan oleh pelanggan.</i></p> |
| <p>8.6.3 Appearance items</p> <p><i>For organizations manufacturing parts designated by the customer as "appearance items," the organization shall provide the following:</i></p> <ul style="list-style-type: none"> <i>a. appropriate resources, including lighting, for evaluation;</i> <i>b. masters for colour, grain, gloss, metallic brilliance, texture, distinctness of image (DOI), and haptic technology, as appropriate;</i> <i>c. maintenance and control of appearance masters and evaluation equipment;</i> <i>d. verification that personnel making appearance evaluations are competent and qualified to do so.</i> | <p>8.6.3 Item penampilan</p> <p><i>Untuk organisasi manufaktur produk yang ditunjuk oleh pelanggan sebagai "penampilan item," organisasi harus menyediakan hal-hal berikut:</i></p> <ul style="list-style-type: none"> <i>a. sumber daya yang tepat, termasuk pencahayaan, untuk evaluasi;</i> <i>b. master untuk warna, guratan, gloss, logam yang berkilau, tekstur, keunikan gambar (DOI), dan teknologi haptic, yang sesuai;</i> <i>c. perawatan dan pengendalian master tampilan dan evaluasi peralatan;</i> <i>d. verifikasi bahwa personil yang melakukan evaluasi penampilan adalah orang yang kompeten dan telah memenuhi syarat.</i> |
| <p>8.6.4 Verification and acceptance of conformity of externally provided products and services</p> <p><i>The organization shall have a process to ensure the quality of externally provided processes, products, and services utilizing one or more of the following methods:</i></p> <ul style="list-style-type: none"> <i>a. receipt and evaluation of statistical data provided by the supplier to the organization;</i> <i>b. receiving inspection and/or testing, such as sampling based on performance;</i> <i>c. second-party or third-party assessments or audits of supplier sites when coupled with records of acceptable delivered product conformance to requirements;</i> | <p>8.6.4 Verifikasi dan keberterimaan kesesuaian terhadap penyedia eksternal produk dan jasa</p> <p><i>Perusahaan harus memiliki proses untuk menjamin kualitas proses eksternal yang tersedia, produk, dan jasa menggunakan satu atau lebih metode berikut:</i></p> <ul style="list-style-type: none"> <i>a. penerimaan dan evaluasi data statistik yang disediakan oleh pemasok ke perusahaan;</i> <i>b. inspeksi penerimaan dan / atau pengujian, seperti pengambilan sampel berdasarkan kinerja;</i> <i>c. penilaian pihak kedua atau pihak ketiga atau audit lokasi pemasok ketika ditambah dengan catatan penerimaan kesesuaian produk yang dikirim sesuai dengan persyaratan;</i> |

| | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>d. <i>part evaluation by a designated laboratory;</i></p> <p>e. <i>another method agreed with the customer.</i></p> | <p>d. <i>evaluasi produk oleh laboratorium yang ditunjuk;</i></p> <p>e. <i>metode lain yang disepakati dengan pelanggan.</i></p> |
| <p>8.6.5 Statutory and regulatory conformity</p> <p><i>Prior to release of externally provided products into its production flow, the organization shall confirm and be able to provide evidence that externally provided processes, products, and services conform to the latest applicable statutory, regulatory, and other requirements in the countries where they are manufactured and in the customer-identified countries of destination, if provided.</i></p> | <p>8.6.5 Kesesuaian terhadap peraturan dan perundangan</p> <p><i>Sebelum merilis produk yang disediakan oleh pihak eksternal ke dalam aliran produksi, organisasi harus mengkonfirmasi dan mampu memberikan bukti bahwa proses penyedia eksternal, produk, dan jasa sesuai dengan hukum, peraturan, dan persyaratan terbaru lainnya yang berlaku di negaranegara lokasi manufaktur mereka dan juga di negara-negara pelanggan teridentifikasi yang dituju, jika diminta.</i></p> |
| <p>8.6.6 Acceptance criteria</p> <p><i>Acceptance criteria shall be defined by the organization and, where appropriate or required, approved by the customer. For attribute data sampling, the acceptance level shall be zero defects (see Section 9.1.1.1).</i></p> | <p>8.6.6 Kriteria Keberterimaan</p> <p><i>Kriteria keterterimaan harus ditetapkan oleh perusahaan dan, bila sesuai atau dipersyaratkan, disetujui oleh pelanggan. Untuk pengambilan atribut sampel data, tingkat penerimaan harus nol cacat (lihat pasal 9.1.1.1).</i></p> |
| <p>8.7 Control of nonconforming outputs</p> <p>8.7.1 The organization shall ensure that outputs that do not conform to their requirements are identified and controlled to prevent their unintended use or delivery.</p> <p>The organization shall take appropriate action based on the nature of the nonconformity and its effect on the conformity of products and services. This shall also apply to nonconforming products and services detected after delivery of products, during or after the provision of services.</p> <p>The organization shall deal with nonconforming outputs in one or more of the following ways:</p> <ul style="list-style-type: none"> a) correction; b) segregation, containment, return or suspension of provision of products and services; c) informing the customer; d) obtaining authorization for acceptance under concession. <p>Conformity to the requirements shall be verified when nonconforming outputs are corrected.</p> | <p>8.7 Kontrol Output Produk Tidak Sesuai</p> <p>8.7.1 Organisasi harus memastikan keluaran yang tidak sesuai dengan persyaratan diidentifikasi dan dikendalikan untuk mencegah dari penggunaan dan penyerahan yang tidak dimaksudkan.</p> <p>Organisasi harus mengambil tindakan yang sesuai berdasarkan sifat ketidaksesuaian dan pengaruh terhadap kesesuaian dari produk dan jasa. Harus berlaku juga untuk ketidaksesuaian produk dan jasa yang terdeteksi setelah penyerahan produk, selama atau sesudah penyediaan jasa.</p> <p>Organisasi harus sepakat melakukan tindakan berkaitan dengan ketidaksesuaian output dengan cara:</p> <ul style="list-style-type: none"> a) koreksi; b) pemisahan, penahanan, pengembalian atau penangguhan penyediaan produk dan jasa; c) memberi tahu pelanggan; d) memperoleh otoritas untuk diterima karena konsesi <p>Kesesuaian terhadap persyaratan harus diverifikasi ketika ketidaksesuaian keluaran dikoreksi.</p> |
| <p>8.7 Control of nonconforming outputs</p> | <p>8.7 Pengendalian output yang tidak sesuai</p> |

| | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>8.7.1 <i>See ISO 9001 :2015 requirements.</i></p> | <p>8.7.1 <i>Lihat persyaratan ISO 9001: 2015.</i></p> |
| <p>8.7.1.1 Customer authorization for concession</p> <p><i>The organization shall obtain a customer concession or deviation permit prior to further processing whenever the product or manufacturing process is different from that which is currently approved.</i></p> <p><i>The organization shall obtain customer authorization prior to further processing for "use as is" and rework dispositions of nonconforming product. If sub-components are reused in the manufacturing process, that sub-component reuse shall be clearly communicated to the customer in the concession or deviation permit.</i></p> <p><i>The organization shall maintain a record of the expiration date or quantity authorized under concession. The organization shall also ensure compliance with the original or superseding specifications and requirements when the authorization expires. Material shipped under concession shall be properly identified on each shipping container (this applies equally to purchased product). The organization shall approve any requests from suppliers before submission to the customer.</i></p> | <p>8.7.1.1 Otorisasi pelanggan terhadap konsesi</p> <p><i>Organisasi harus mendapatkan konsesi pelanggan atau izin penyimpangan sebelum diproses lebih lanjut kapanpun produk atau proses manufaktur berbeda dari yang saat ini disetujui.</i></p> <p><i>Organisasi harus mendapatkan otorisasi pelanggan sebelum diproses lebih lanjut untuk "digunakan saja" dan disposisi rework produk yang tidak sesuai. Jika sub-komponen digunakan kembali dalam proses manufaktur, sub-komponen yang digunakan kembali harus jelas dikomunikasikan kepada pelanggan dalam bentuk izin konsesi atau penyimpangan.</i></p> <p><i>Organisasi harus memelihara catatan tanggal kadaluarsa atau kuantitas yang berwenang melalui konsesi. Organisasi juga harus memastikan kesesuaian dengan spesifikasi asli atau penggantian dan persyaratan ketika otorisasi berakhir. Material yang telah dikirim melalui konsesi harus diidentifikasi dengan benar pada setiap kontainer pengiriman (ini berlaku sama untuk produk yang dibeli). Organisasi harus menyetujui setiap permintaan dari pemasok sebelum disampaikan kepada pelanggan.</i></p> |
| <p>8.7.1.2 Control of nonconforming product - customer - specified process</p> <p><i>The organization shall comply with applicable customer-specified controls for nonconforming product (s).</i></p> | <p>8.7.1.2 Pengendalian produk yang tidak sesuai - proses tertentu - pelanggan</p> <p><i>Organisasi harus mematuhi pengendalian spesifik pelanggan yang berlaku untuk produk tidak sesuai.</i></p> |
| <p>8.7.1.3 Control of suspect product</p> <p><i>The organization shall ensure that product with unidentified or suspect status is classified and controlled as nonconforming product. The organization shall ensure that all appropriate manufacturing personnel receive training for containment of suspect and nonconforming product.</i></p> | <p>8.7.1.3 Pengendalian produk yang dicurigai</p> <p><i>Organisasi harus memastikan bahwa produk dengan status tidak teridentifikasi atau dicurigai telah diklasifikasi dan dikendalikan sebagai produk tidak sesuai. Organisasi harus memastikan bahwa semua personel manufaktur yang sesuai menerima pelatihan untuk penanganan produk yang dicurigai dan produk yang tidak sesuai.</i></p> |
| <p>8.7.1.4 Control of reworked product</p> <p><i>The organization shall utilize risk analysis (such as FMEA) methodology to assess risks in the rework</i></p> | <p>8.7.1.4 Pengendalian Pengerjaan Ulang Produk</p> <p><i>Organisasi harus menggunakan metodologi analisis risiko (seperti FMEA) untuk menilai risiko yang ada</i></p> |

|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p><i>Where the customer has specific prescribed processes, tools, or systems for problem solving, the organization shall use those processes, tools, or systems unless otherwise approved by the customer.</i></p> | <p><i>Saat pelanggan memiliki proses tertentu yang telah ditentukan, alat, atau sistem untuk pemecahan masalah, organisasi harus menggunakan proses, alat, atau sistem tersebut kecuali tidak disetujui oleh pelanggan.</i></p> |
| <p>10.2.4 Error-proofing</p> <p><i>The organization shall have a documented process to determine the use of appropriate error-proofing methodologies. Details of the method used shall be documented in the process risk analysis (such as PFMEA) and test frequencies shall be documented in the control plan.</i></p> <p><i>The process shall include the testing of error-proofing devices for failure or simulated failure. Records shall be maintained. Challenge parts, when used, shall be identified, controlled, verified, and calibrate where feasible. Error-proofing device failures shall have a reaction plan.</i></p> | <p>10.2.4 Anti Salah</p> <p><i>Organisasi harus memiliki proses terdokumentasi untuk menentukan penggunaan metodologi anti salah yang tepat. Rincian dari metode yang digunakan harus didokumentasikan dalam analisa risiko proses (seperti PFMEA) dan frekuensi pengujian harus didokumentasikan dalam control plan.</i></p> <p><i>Proses ini harus mencakup pengujian perangkat anti salah untuk kegagalan atau simulasi kegagalan. catatan harus dipelihara. part yang ditolak, bila digunakan, harus diidentifikasi, dikendalikan, diverifikasi, dan dikalibrasi agar layak. Kegagalan perangkat anti salah Kesalahan pemeriksaan harus memiliki rencana tindakan.</i></p> |
| <p>10.2.5 Warranty management systems</p> <p><i>When the organization is required to provide warranty for their product(s), the organization shall implement a warranty management process. The organization shall include in the process a method warranty part analysis, including NTF (no trouble found). When specified by the customer, the organization shall implement the required warranty management process.</i></p> | <p>10.2.5 Sistem Manajemen Garansi</p> <p><i>Ketika organisasi diperlukan untuk memberikan jaminan garansi untuk produk mereka, organisasi harus melaksanakan proses manajemen garansi. Organisasi harus mencakup dalam proses analisis metode garansi part, termasuk NTF (no trouble found). Ketika ditentukan oleh pelanggan, organisasi harus menerapkan proses manajemen garansi yang diperlukan.</i></p> |
| <p>10.2.6 Customer complaints and field failure test analysis</p> <p><i>The organization shall perform analysis on customer complaints and field failures, including any return parts, and shall initiate problem solving and corrective action to prevent recurrence.</i></p> <p><i>Where requested by the customer, this shall include analysis of the interaction of embedded software of the organization's product within the system of the final customer's product.</i></p> <p><i>The organization shall communicate the results of testing/analysis to the customer and also within the organization.</i></p> | <p>10.2.6 Keluhan pelanggan dan analisis uji kegagalan lapangan</p> <p><i>Organisasi harus melakukan analisis pada keluhan pelanggan dan kegagalan lapangan, termasuk produk yang dikembalikan, dan melakukan pemecahan masalah dan tindakan korektif untuk mencegah terulang kembali.</i></p> <p><i>Jika diminta oleh pelanggan, ini juga meliputi analisis interaksi perangkat lunak yang tertanam pada produk organisasi dalam sistem produk akhir konsumen.</i></p> <p><i>Organisasi harus mengkomunikasikan hasil pengujian / analisis kepada pelanggan dan juga dalam organisasi.</i></p> |
| <p>10.3 Continual Improvement</p> | <p>10.3 Peningkatan berkelanjutan</p> |

| | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>The organization shall continually improve the suitability, adequacy and effectiveness of the quality management system.</p> <p>The organization shall consider the results of analysis and evaluation, and the outputs from management review, to determine if there are needs or opportunities that shall be addressed as part of continual improvement.</p> | <p>Organisasi harus meningkatkan kesesuaian, kecukupan dan keefektifan sistem manajemen mutu secara berkelanjutan.</p> <p>Organisasi harus mempertimbangkan hasil analisis dan evaluasi, serta keluaran tinjauan manajemen, untuk menetapkan jika ada keperluan atau peluang yang harus ditangani sebagai bagian dari peningkatan berkelanjutan.</p> |
| <p>10.3 Continual improvement</p> <p><i>See ISO 9001:2015 requirements.</i></p> | <p>10.3 Peningkatan terus menerus</p> <p><i>Lihat persyaratan ISO 9001: 2015.</i></p> |
| <p>10.3.1 Continual improvement - Supplemental</p> <p><i>The organization shall have a documented process for continual improvement.</i></p> <p><i>The organization shall include in this process the following:</i></p> <ul style="list-style-type: none"> <i>a. identification of methodology used, objectives, measurement, effectiveness and documented information.</i> <i>b. a manufacturing process improvement action plan with emphasis on the reduction of process variation and waste;</i> <i>c. risk analysis (such as FMEA).</i> <p>NOTE <i>Continual improvement is implemented once manufacturing processes are statistically capable and stable or when product characteristics are predictable and meet customer requirements.</i></p> | <p>10.3.1 Peningkatan terus menerus – tambahan</p> <p><i>Organisasi harus memiliki proses yang terdokumentasi untuk peningkatan terus-menerus.</i></p> <p><i>Organisasi harus menyertakan proses ini sebagai berikut:</i></p> <ul style="list-style-type: none"> <i>a. identifikasi metodologi yang digunakan, tujuan, pengukuran, efektivitas, dan informasi yang didokumentasikan;</i> <i>b. proses manufaktur merencanakan perbaikan dengan penekanan pada pengurangan variasi proses dan limbah;</i> <i>c. analisis risiko (seperti FMEA).</i> <p>CATATAN <i>Peningkatan berkelanjutan dilaksanakan setelah proses manufaktur secara statistik mampu dan stabil atau ketika karakteristik produk dapat diprediksi dan memenuhi kebutuhan pelanggan.</i></p> |
